Inspiring and supportive of the creative process. Thank you for this book Shaun. Mr. The author mentions that personal immersion is vital. Very long winded making it rather a boring read. This force is the primary carrier of creation. When everything seems as if it is hopeless and going nowhere. trust the process. Just stunning. Sophisticated reading. It is not a how to. It does not have pictures. There are also comments that teachers may find interesting. Art education is very restricted with mandated assessments etc. I find it intriguing. It is a frustrating path. It requires exposure frustration and even failure. Overall I have found this book very interesting
