

Rescued by the Alien Viking (Galactic Vikings, #1) By Lucee Joie I couldn't understand how this heroine Tora went from being scared of the Vikings and their mail-order bride program especially because the Vikings had continued to perpetuate this false narrative that they were ruthless raping and conquering villains to protect themselves. But can Tora chip away at Ragnex's harsh exterior to find the man beneath the beast? If you desire a happily ever after with unbelievably hot alien Vikings no cheating and steamy sex scenes then grab your copy today. Rescued by the Alien Viking (Galactic Vikings #1) Exciting Where has Lucee Joie been all my reading life? I have always been fascinated with the Viking lore and she has come up with alien Vikings and I love them! This in the first book in the series and I can tell it will be an exciting steamy action packed series. Romance Science Fiction ☐ FREE on Amazon today (9/17/2022)! ☐ Romance Science Fiction Monstrous worms or marrying into a brutal race? Human women have 2 choices in life now- stay on Earth where since humans brought back larvae of a monster worm that only infects women to kill them after the young use them as a host life isn't so great or make use of a mail order bride program that the only recipients of human women are a race of aliens so brutal the worms might be better. Great options right? Tora has dealt with the worms declining human populations her friends being killed her mom ditching her for a marriage of her own and not looking back and now is ready- after her latest loss- to marry in hopes that she can persuade the Vikingr to take in more humans and not just women. So how did they not create sanctuary cities or better weapons to keep from being killed or becoming hosts? How were women not immediately moved to safety so humans wouldn't die out? Big walls hook into a natural gas line for flames spaced along the walls as deterrent and some concrete if they're burrowing monsters (something never stated but must be because other humans would have hunted and killed these things in retribution). Did they crossbreed with another race? How exactly did bronze age humans manage to make it through the atmosphere and into space? It would have been more likely that they were interesting to observing aliens and select Norse were taken in by them. It is what it is... Will it win awards? Probably not but is it fun and easy to read? And does it scratch a trash read itch? You bet it does!!! It had heart and courage and of course a good dose of obsessive Insta love too! Read it and just enjoy it! Lol. The female character Tora volunteered for the Mail Order Bride Program and the commander of the ship gives the next bride in the program to Ragnex one of the command's best Vikings. This just did not hold my attention I got bored with the plot when I couldn't find the point to make their relationship believable but tried to force myself to continue ending up giving up. At my age (60) life is way too short & my time is too important to force myself to read a book I'm not enjoying especially when there are so many other books out there waiting to be read. oh wait did we mention his species the Vikingr are reputed to be the most violent species in the galaxy? This done in one Kindle Unlimited quick read stands alone and launches a series where two separate communities come together to rescue one another from very different yet equally concerning threats. The plot had a tiny bit of potential but once we set up the MCs in their arranged marriage it was like the author abandoned it: These alien Vikings were far too modern for my taste in their speak and thought: The forced emotions and feelings they supposedly felt for one another came across as flat and boring: And yet she just relaxes with him.

Lucee Joie likes long walks on the beach after dark so that she can gaze at the stars and plan for her own alien abduction, She also likes reading and listening out for things that go bump in the night, Lucee Joie is the pen name for a popular author who chooses to remain anonymous, She writes the cocky smut you wanna read! A hunky alien from a barbaric race: A human so desperate to flee her planet that she enrolls in the Vikingr mail order bride program: What could possibly go wrong? The Earth is a desolate wasteland taken over by space snakes determined to kill off humankind one woman at a time, However there is one option in order to be free of the wretched place: agree to become a mail order bride for the fierce breed of Vikingr aliens, Tora is so desperate to leave the treacherous planet that she signs up to marry an alien that she has never actually met. Ragnex is just happy to finally be involved in something more than work. It seems like a good idea to Tora at first—even if the Vikingr have a certain reputation for being a brutal race. Known throughout the

universe as fierce and battle-hungry it is a ruse that these aliens are determined to keep in order to protect their planet from further plundering. The world building is great and the characters elicit an investment in their well-being and a HEA: I look forward to Book Two! Romance Science Fiction Better than I was expecting. I love strong women but I also love badass Viking warriors. But the descriptions she's heard about these guys don't begin to do them justice, Humans were curious stupid and brought their own doom planetside. I'm guessing that while they may not use men as hosts these worms are huge and need to eat something: It's never stated why humanity fell or how long ago it happened, Also how did the Vikingr make contact? There's no mention of them needing women, There's a brief mention of the Vikingr being from human Vikings who made it into space but no mention of why they appear so different. Evolving to adapt to their environment would explain some changes but not how (or why) they now have near sentient reptilian hair. It looks like this is going to be primarily character driven but with insta-love/lust and next to no bonding outside the bedroom, For those looking for a quick and light read between heavier tales this would suit, Romance Science Fiction

Almost okay It takes a special kind of book for me to quit it within 26 pages of the end: I read a free prequel that was really good and now I'm disappointed, The book starts with the mail order bride program in place and I feel like I missed something even though I read a prequel: We are immediately thrown into a dangerous situation which draws you in: The whole setup with the lindworms and the alien vikings is so silly this story cannot qualify as sci fi: Then the end comes and you realize the protagonists are stupid and barely trying to solve their own problems: Ragnex goes to Earth a now devastated planet in search of lindworms for their blubber. For human females even a greater danger as they can plant their eggs inside them leaving them to incubate, Ragnex stumbles across Tora as she and a friend try to outrun a lindworm. Tora separated from her friend hides in an old building where she hopes to escape the lindworm and the Viking. She has heard enough harrowing tales about the Vikings to consider them equally dangerous: There were some really good parts to the story like the Viking rune markings but there wasn't much detail in this area for Book 1, The plot seems good and sets things up for the second book but I was just left wanting. Romance Science Fiction DNF - quit at 56% I think this read a bit like fanfic or maybe a very young writer as it just was too easy or uncomplicated: There are definitely plot holes & it seems everything is just too easy between the main characters: She goes from terrified of the alien Vikings to just complacent & accepting of them within a day: Even the slim chance that the alien she ends up with is the one she saw the day before just seemed too easy. I wanted to like the couple but just couldn't get behind them cause there's not a lot of character development to make them matter in my mind, her Mom got off Earth when she realized staying was like a death sentence but left her daughter behind, Ragnex is a tough warrior fierce in battle against lindworms always ready to fight for and defend a family member, This Alien sounds a little too good to be true for Tora, Romance laughs gets drunk drools over him and gets right down to fucking within 2 days[1]

Science Fiction 1 Star Hm nope. This was super weird for me. The writing was juvenile and unpolished. It didn't flow well at all. Neither character had much substance. Unrealistic. I really liked it. This had both. I'm actually looking forward to reading the next one. No one mentioned they had snakes for hair! Spoilers ahead. There's so very little world building. Humans are smart. usually.

And 1 Vikingr has several human wives in fact. Readers are left with so many questions. I did enjoy the jokes the Vikingr played on others. Romance Science Fiction Look. The protagonists seem nice enough. Then there's some action on the ship. It was a little silly but fine. There is no character growth or competence displayed. I'm just going to imagine a lindworm ate them both. Romance Science Fiction I give this book 3.5 stars rounded to 4 out of 5. My first beef is the title. Sold To The Alien Viking. There was no sale. So maybe Given to the Alien Viking. Lindworms are very dangerous creatures. The birth of the ram kills the host immediately. I felt that was a missed opportunity toward world building. I deleted this from my Kindle library. Romance Science Fiction . always fight for my family. Tora has trust issues. Tora isn't one to repeat her mother's mistakes. Sureeeee. I hated it. ☐☐ Romance Science Fiction.
